

## Writing foreign accents on Chromebooks:

The image shows a Chrome OS desktop environment. At the top, the Chrome menu is open, with the 'Settings' option highlighted by a red box. A red arrow points from the 'Settings' option to the 'Languages' section in the main settings area. Below this, the 'Languages and input' settings window is open, showing a list of languages on the left and detailed settings for 'English (United States)' on the right. The 'Input Method' section is expanded, showing various keyboard layouts. A red box highlights the 'INTL' icon in the system tray at the bottom right.

After clicking **Settings** scroll all the way to the bottom of the page and choose **Show advanced settings.....** Scroll down to **Languages**

**Languages**  
Change how Chrome handles and displays languages  
Language and input settings...

**Languages and input**  
Add languages and drag to order them based on your preference.  
For text input, select a language to see available input methods.

**Languages**

- English (United States)
- Spanish (Latin America)

Add

**English (United States)**

Google Chrome is displayed in this language  
This language is used for spell checking

**Input Method**

- US keyboard
- US international keyboard
- US extended keyboard
- US Dvorak keyboard
- US Colemak keyboard
- US Mystery keyboard

Done

1 8:34 [Icons] **INTL** [Profile]

In US International:

The ` key (left of the 1) plus the letter will make an accent grave, e.g. è, ù, à.

The ´ key (left of the enter key) plus the letter will make an acute accent, or a cedilla if you type a c, e.g. á, é, ç.

The ^ key (Shift-6) plus a letter will make a circumflex, e.g. û, ê.

The ¨ key (shift + key left of the enter key) plus a letter will make a tréma/umlaut, e.g. ü, ö.
